

1. Consider the `website_traffic.csv` data file. This file contains information related to the number of visits to a small website on each day; if a user accesses the site after 30 minutes of inactivity, that will be logged as a new visit.
 - (a) (3 points) Load the data file to tableau.
 - (b) (4 points) Create a bar chart that shows the number of visits per day of the week.
 - (c) (3 points) Using the chart from part (b), what day of the week has the most number of visits? what day of the week has the least number of visits?
2. Using the `Global Superstore.xls` do the following:
 - (a) (3 points) Load the `Orders` sheet.
 - (b) (5 points) Duplicate the chart shown below.

- (c) (3 points) What is the big take-away message from the above heatmap?

¹Make sure you submit a `*.twb` file in Blackboard.
