1. Consider the `World Bank Indicators.xlsx` datafile. This datafile contains information related to different indicators such as life expectancy, health spend, etc.

   (a) (3 points) Load the `World Bank Indicators.xlsx` datafile to tableau.

   (b) (5 points) Open a new worksheet and create a map that shows the population and life expectancy at the country level in 2010.

   (c) (5 points) Open a new worksheet and create a bar chart that shows the health expenditure total (% GDP) in 2010. Also add a parameter called `Health Exp Threshold % GDP` that allows the user to quickly identify the countries that have a health expenditure greater than the threshold. Notice that the parameter should be a float number from 1 to 15.

   (d) (5 points) Open a new worksheet and create a dual-axis chart that shows the usage of internet and cellphone over time. Also make sure to add country filter.

   (e) (7 points) Create a dashboard with the charts from parts (b), (c) and (d), call it `Global Indicators`.

   (f) (7 points) Create a story with the charts from parts (b), (c) and (d), call it `Global Indicators`.
